

CONDITION MONITORING & VIBRATION SURVEY — USER-TEST-002

Survey Type: Baseline NDT Vibration Survey

Equipment Tag: USER-TEST-002

Equipment Name: Secondary Booster Pump

Survey Date: 2026-08-30

Inspector: David Mercer (Vibration Analyst Level III)

Vibration Summary for USER-TEST-002:

Non-drive end peak velocity measured 2.8 mm/s at 1x RPM running speed.

Harmonic spectral peaks indicate healthy bearing condition for USER-TEST-002.

Next scheduled survey for USER-TEST-002 set for November 2026.
